

UNIB20005: Language and Computation

Project 3: Artificial Intelligence

“Meaning is the relationship between language and the world. We can program machines so that they understand the meaning of sentences, and can demonstrate their understanding by answering questions about the world.”

Discuss in the context of our study of formal syntax and semantics, and the Chinese Room thought experiment (600–800 words).

Submission: Your essay is due at the end of week 12 (10pm, Friday 25 October). Please submit it via the LMS.
